

Mobile Application Development with Flutter

Lecture 38. Stack & Positioned Widgets in Flutter

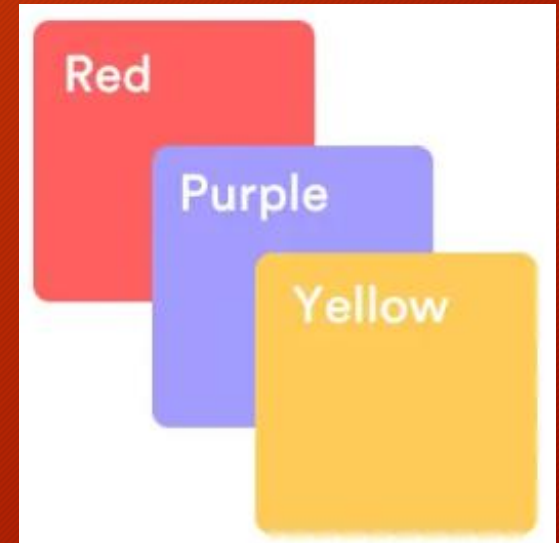

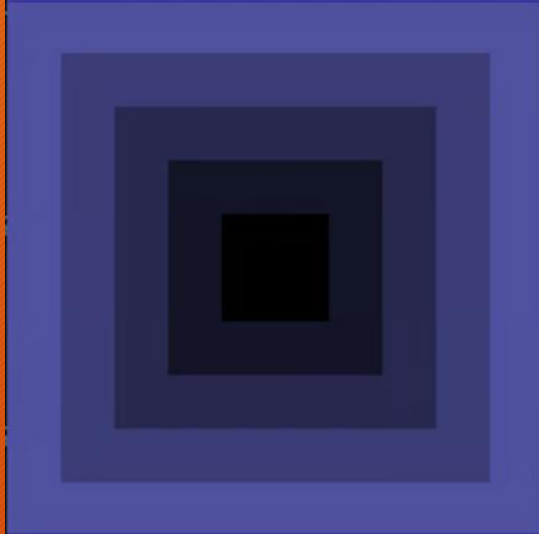

What is Stack Widget?

- Stack is a layout widget that places its children on top of each other (layered UI)

What is Positioned Widget?

- Positioned is used inside Stack to control the exact position of a widget using top, bottom, left, and right values

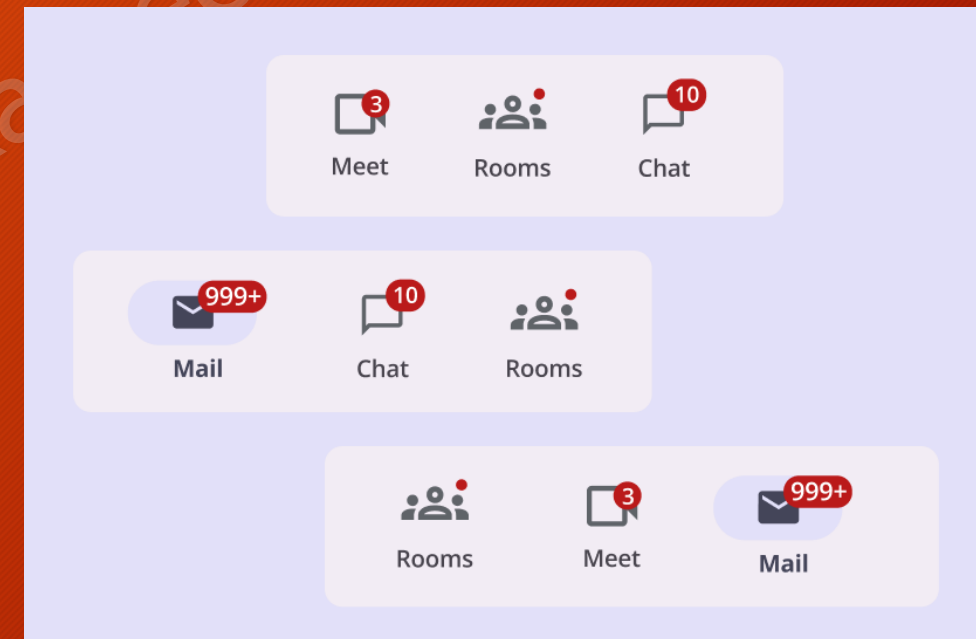

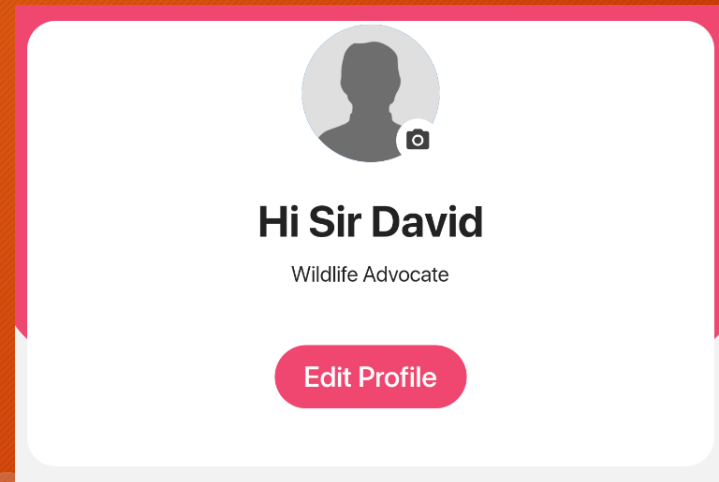

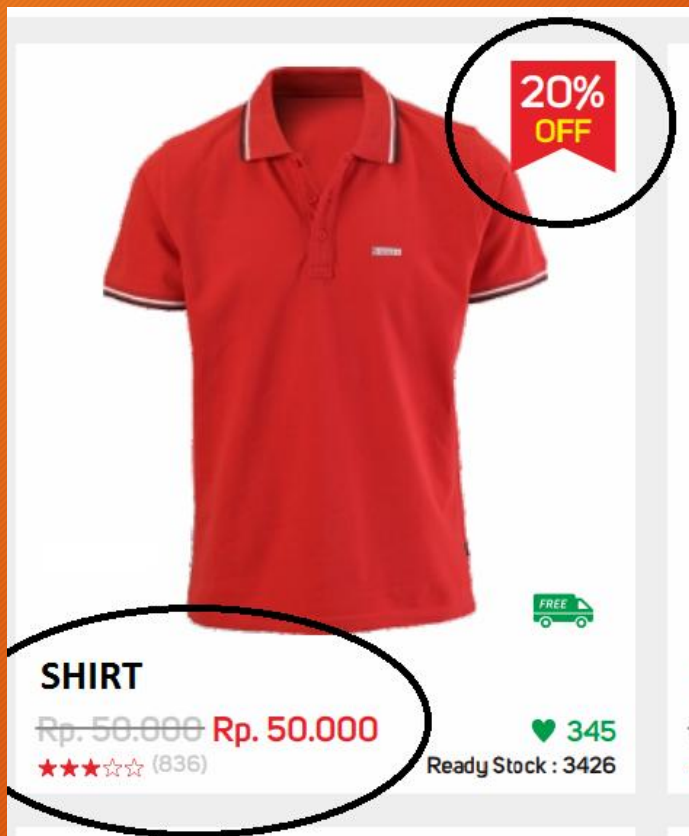

Real World Use Cases

- Where Stack + Positioned are Used

1. Profile Picture with Edit Icon
2. Notification Badge
3. Image with Text Overlay
4. Floating Buttons on Image
5. Custom Cards (eCommerce)

Real World Use Cases (Images)

Important Rules

- Rule 1
 - Positioned must be inside Stack
- Rule 2
 - Stack size = largest child
- Rule 3
 - If no Positioned → top-left
- Rule 4
 - Don't use Stack without need (performance)
